Orange finger sponge

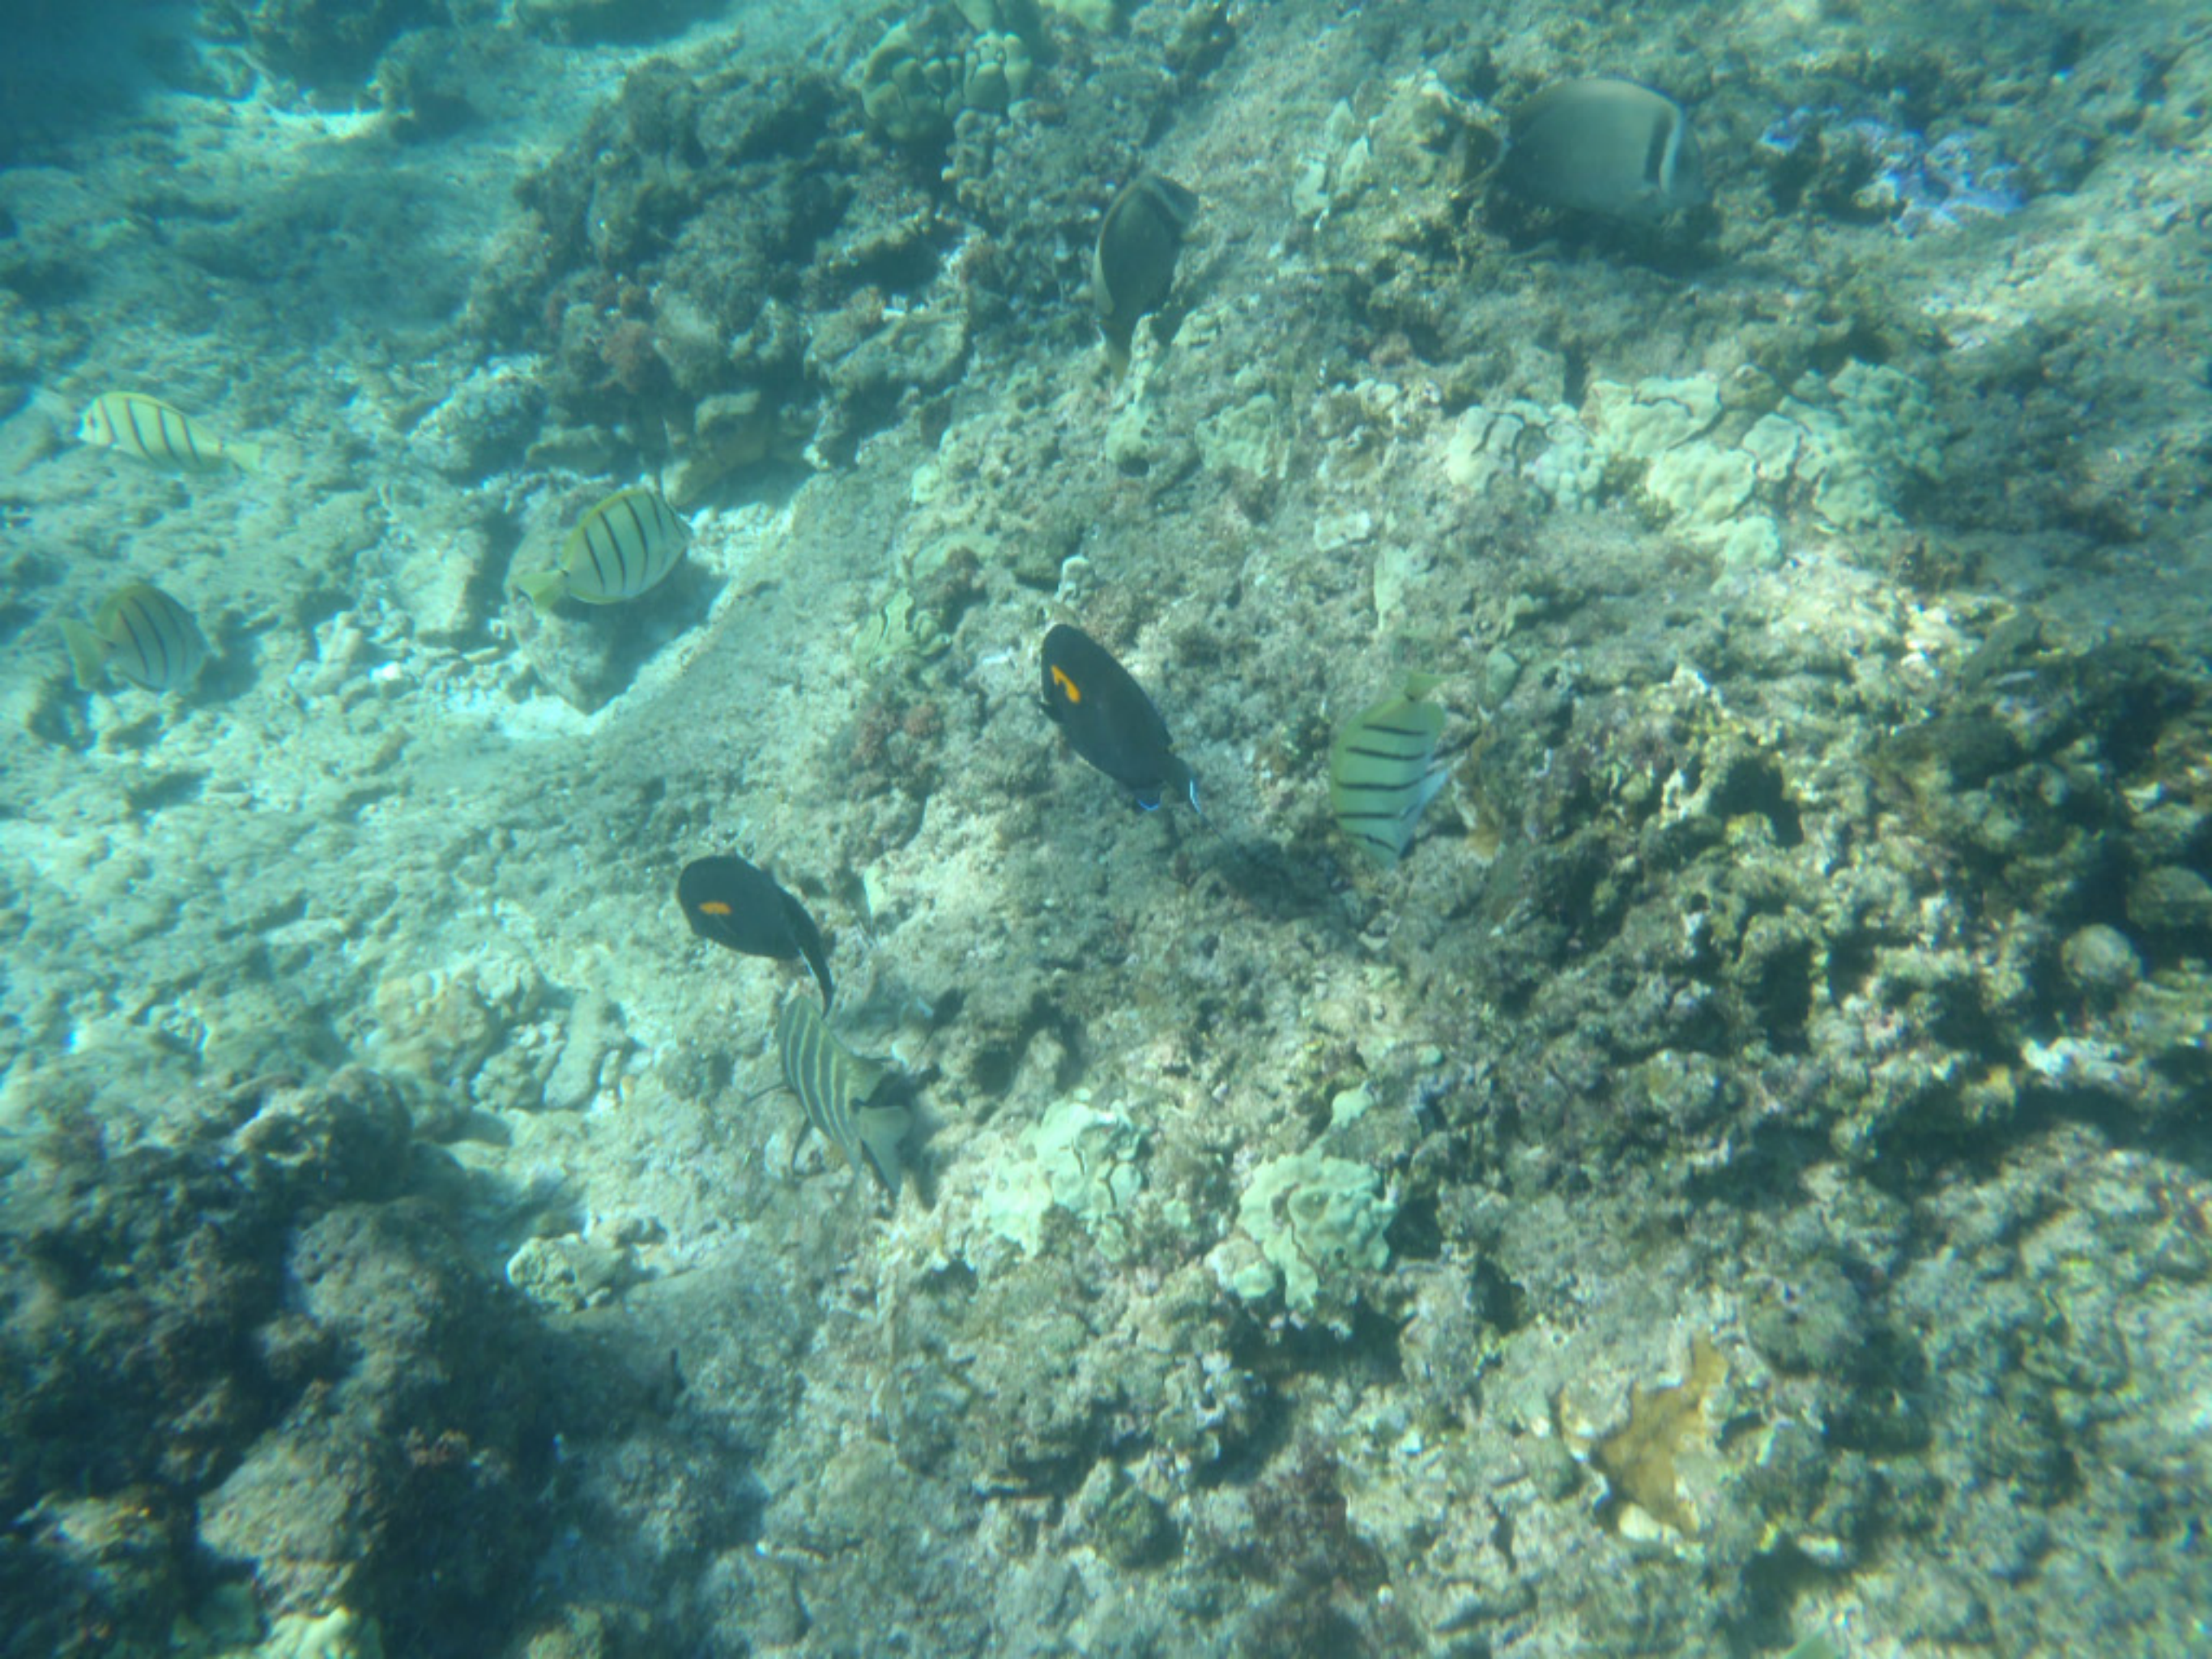

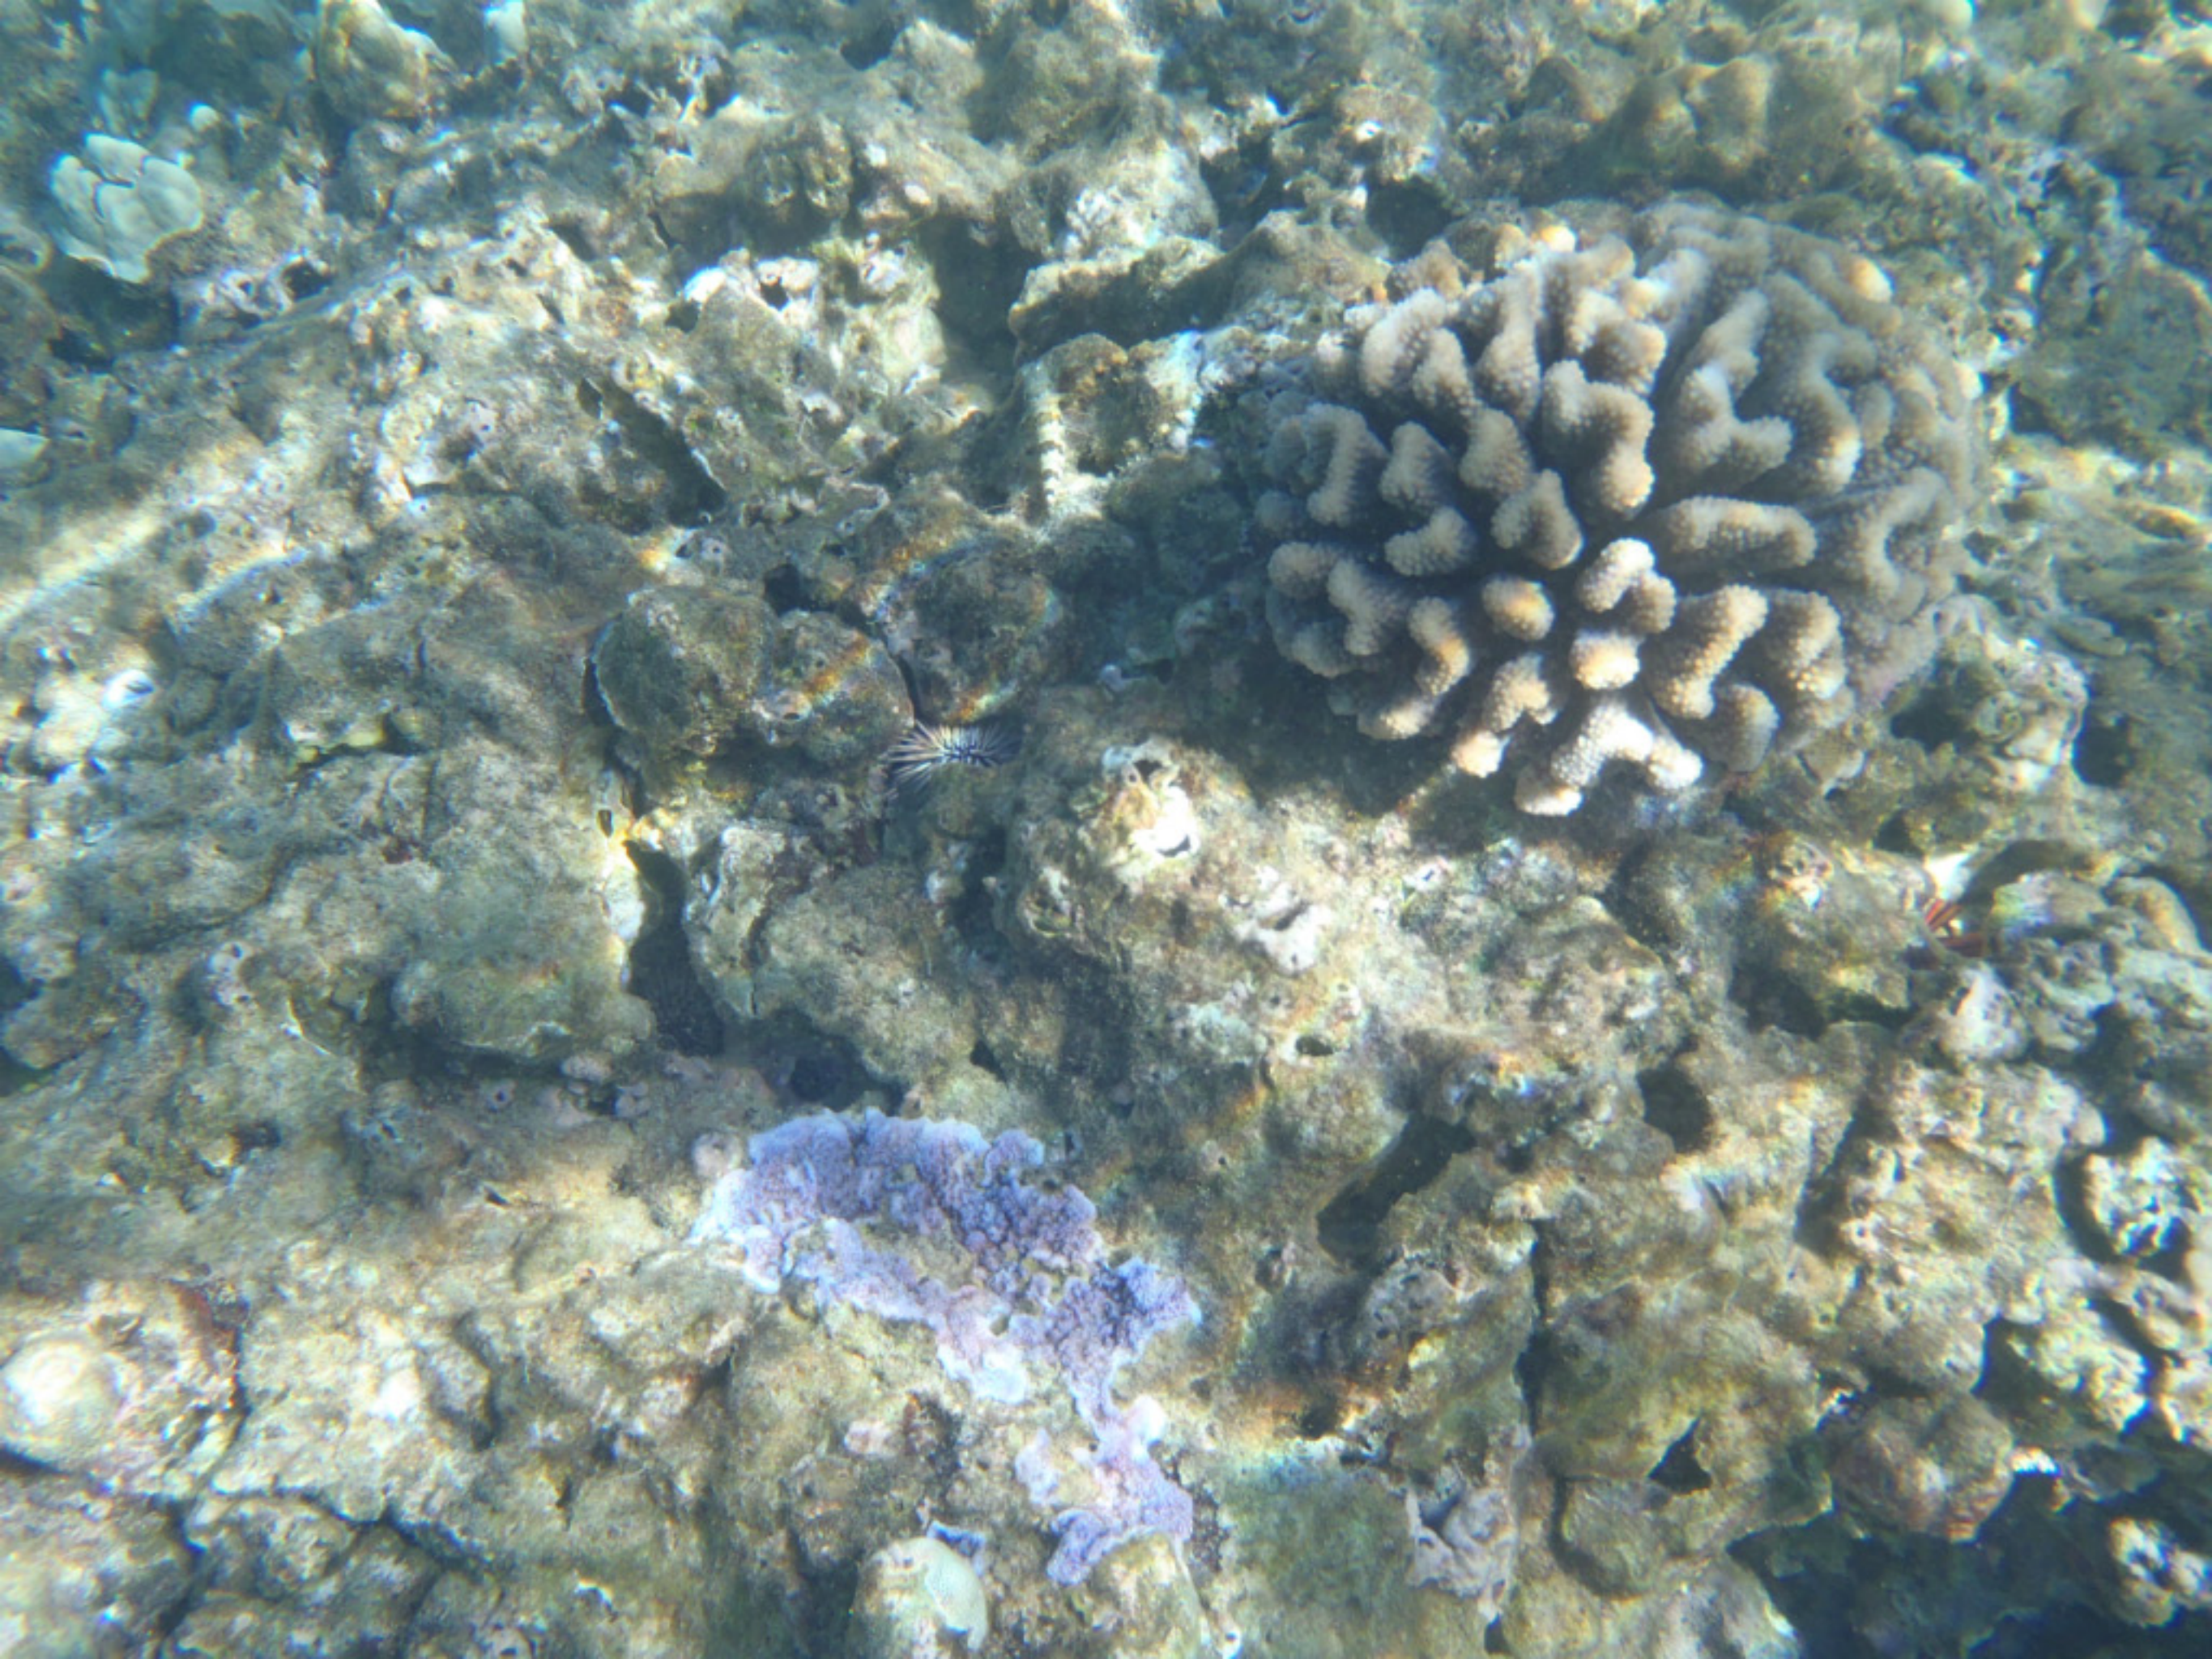

Spiny Pufferfish

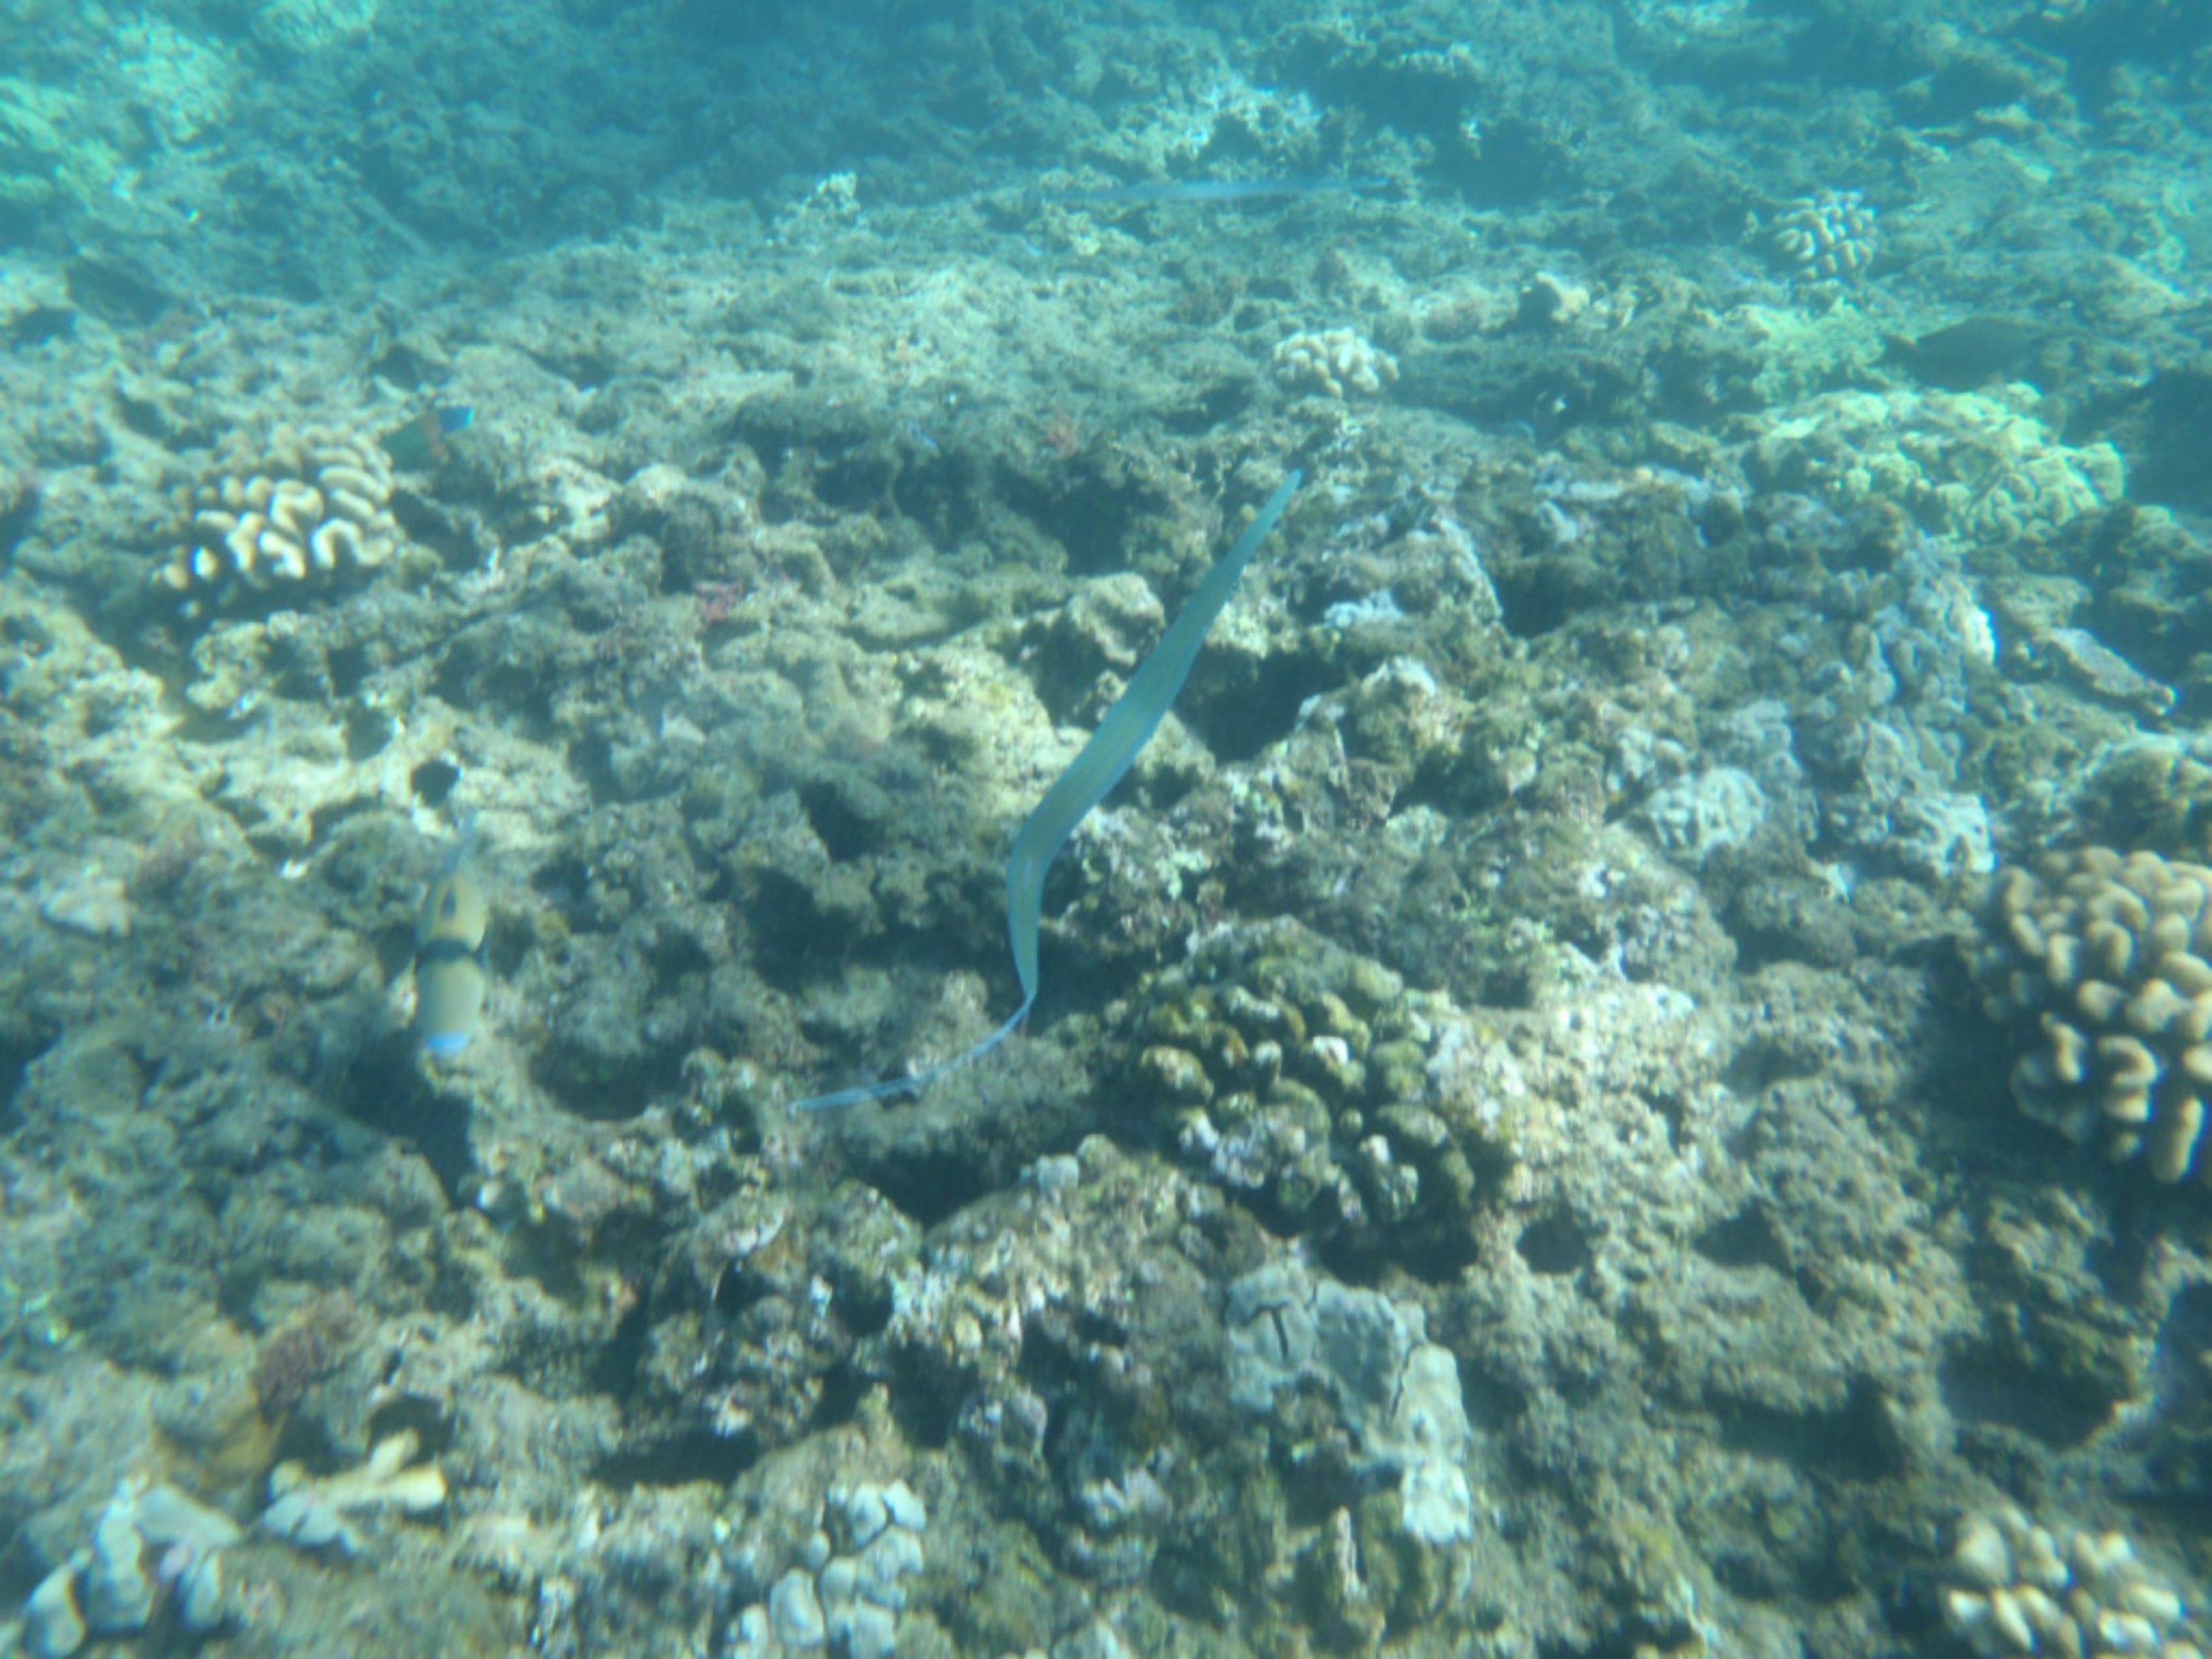

A Spotted Moray eel is shown resting on a sandy and rocky seabed. The eel has a brownish body covered in numerous small, white, circular spots. It is positioned diagonally across the frame, with its head towards the upper left and its body extending towards the lower right. The surrounding environment is a mix of light-colored sand and darker, textured rocks. The water is clear, and the lighting is bright, highlighting the eel's patterned skin.
